

Disconnection Module

Model : DISMOD**

Disconnection modules are designed for telecommunication and data communication networks and are available in 8 pair, 10 pair sizes. Disconnection modules have two piece contacts normally closed, incorporating a disconnection facility, this gives all the features as above plus the added advantage of individual pair disconnection and four wire test access. Connection modules have a one piece contact providing a continuous link between permanent wiring and jumper wiring, giving provision for monitoring access and over voltage.

Feature

- ◆ Insulation displacement contacts on front and rear.
- ◆ Flexible indoor and outdoor use.
- ◆ Can be used as drop wire module in military field installations/rural telecom network.
- ◆ Overvoltage/Overcurrent protection
