

Cat 6A S/FTP Patch Cord

Model : PC-C6A-SFTP-*

Features

- High-performance transmission: Supports data rates up to 10 Gbps with a 500 MHz bandwidth, ensuring stable and efficient network performance.
- S/FTP shielding: Each pair is individually foil-shielded with an overall braided screen to provide superior protection against electromagnetic interference (EMI) and crosstalk.
- Exceptional performance & reliability: Delivers long-lasting durability while meeting the demands of high-speed data transfer.
- Transmission Standards: Tested to meet the ANSI/TIA/EIA-568.2-D standard, ensuring reliable performance.

Benefits

- Extended transmission distances support demanding environments requiring high bandwidth over greater spans.
- High durability and compression resistance make it suitable for mission-critical applications.
- User-friendly and easy-to-install design makes it an efficient solution for high-speed Ethernet connectivity
- Low transfer loss ensures minimal signal degradation across long distances.
